

RESOLUTION REQUESTING A FULL ENVIRONMENTAL IMPACT STATEMENT BE DONE ON THE PROPOSED NORTH BREEZE DAIRY OPERATION IN THE TOWN OF LITTLE BLACK, TAYLOR COUNTY, WI

WHERE AS, North Breeze Dairy has proposed a 4000 cow/5600 AU (animal unit) dairy operation in the Town of Little Black, Taylor County; and

WHERE AS, This dairy operation will produce an estimated 512,000 pounds of untreated waste per day. This large amount of manure will threaten the quality of the groundwater and surface watersheds; and

WHERE AS, This dairy operation will consume an estimated 200,000 gallons of groundwater per day and pose a threat to existing and future well capacity of the nearby Village of Stetsonville and residential wells. It will also pose a threat to natural springs in the area: and

WHERE AS, This dairy operation will emit high levels of ammonia and other hazardous substances potentially affecting the quality of life for nearby residents.

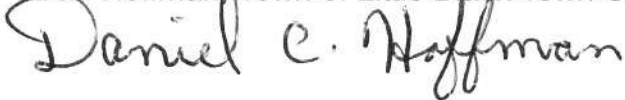

NOW THEREFORE, BE IT RESOLVED, that the Little Black Town Board requests a full Environmental Impact Statement prepared by the DNR. The Town Board also requests a formal public hearing following the completion of the EIS. Said EIS shall be made available to the public prior to the scheduled public hearing to be held at a place designated by Little Black Town Board. The Town Board also requests that no permits be issued or construction be commenced until the decision of the hearings be announced.

BE IT FURTHER RESOLVED, that a precedent was established by the DNR when it required an EIS for the Rosendale Dairy operation in Fond du Lac County.

Offered this eighth day of February, 2009.

Respectfully Submitted:

Dan Hoffman, Town of Little Black Town Chairman

Allan Peissig, Town of Little Black Supervisor

Bryan Jochimsen, Town of Little Black Supervisor
